

Accelerate Growth, Drive Change and Empower Your Team with CuroGens

CuroGens Sales Sheet

Experience and Expertise

CuroGens' software architects and project managers design, deploy and support solutions utilizing a variety of programming languages, and a portfolio of products from the following partners:

Microsoft: Dynamics® 365, AX, and CRM, as well as Windows Azure, SharePoint, Power BI, Office 365 and other Microsoft .NET based applications

Formpipe: Lasernet for Microsoft Dynamics and other ERP systems

Dynamic business solutions for global organizations

CuroGens, Inc, is a technology services provider and systems integrator serving the IT and business intelligence needs of companies worldwide. Our team members connect organizations to the power of data in industries such as transportation, manufacturing, education and professional services.

Our services include:

Software System Integration, Upgrade and Implementation

Whether your ERP solution is no longer meeting your needs or you're ready to implement a cloud-based CRM system to optimize sales performance, CuroGens is ready for the challenge. Qualified consultants will review your company's business goals and key processes to design and deploy a highly efficient solution.

Custom Solution Development

Not every solution meets your needs out of the box. From the integration of multiple systems to expanding global reach across the cloud, our experienced team will partner with yours to create an effective solution that maximizes return on your IT investment.

Business Intelligence

Empower people across the organization to make more informed business decisions. By leveraging the agility of Dynamics 365 and Power BI, for example, we can help to ensure your ERP or CRM solutions can quickly generate sales reports, financial dashboards and actionable business intelligence.

Training and Support

Effective staff training and ongoing support is crucial to the success of any technology system. The CuroGens team will work to understand your unique needs or resource gaps, and then create custom training paths and support solutions to foster a more sustainable IT infrastructure.

Business Consulting and IT Advisory

Our globally diverse team brings several decades of IT, business operations and entrepreneurial experience to the table. Once we understand your organizational pain points and bottom-line goals, our team can engineer solutions that deliver significant outcomes through the integration of technology and business processes.

Director Albert Akuamoah

Albert Akuamoah was born in Accra, Ghana and raised in Akropong-Akuapem, located in the Eastern region of the country. He moved to the United States as a teenager and remained there to study computer engineering and mathematics at the University of Illinois Urbana-Champaign. Albert earned his Bachelor of Science degree from the school in 2004.

Albert serves as Director for CuroGens Ghana Ltd. He has 13 years of software development experience within various industries in the manufacturing and services space. In his role, he oversees CuroGens' office in Ghana, where he works with local customers and manages office resources and vendor accounts.

Our Business Philosophy

The translation of CuroGens is "helping others" and that's truly what the company is all about. The worldwide team identifies gaps in the way current business practices are executed and creates innovative solutions that help organizations solve complex challenges.

As an organization, we strive to:

- Empower our customers to make more informed business decisions
- Align innovative product and solution design with function and utility
- Accelerate business success by making data accessible and meaningful
- Be inspired each day to better serve the needs of our clients and community

Proprietary Business Solutions by CuroGens

The products in our current portfolio of proprietary software solutions were inspired by the desire to help organizations solve complex problems. These include:

CuroGens mv360 is a sales, service and warranty claims management solution for manufacturers of motor vehicles such as recreational or powersport vehicles, watercraft, and heavy duty trucking. Designed to drive bottom-line profitability, the software centralizes and streamlines processing of vehicle warranty registrations, claims authorizations and parts orders between the OEM and its dealer network.

CuroGens Learning is a solution that incorporates science-based teaching methodologies and educator training with technology to promote more effective learning. Specifically, this solution addresses the challenges related to the prevention and recovery of dropout students. For school teachers, CuroGens Learning enables more effective K-12 education as it empowers teachers to establish student-centered learning environments that remove the constraints of fixed-timeline curriculum. For government agencies and corporate trainers, CuroGens Learning enables adult learners to reach their educational, workforce readiness or professional development goals faster.
